- **Q2 2015 sales increased 13 percent year-over-year to \$1.17 billion**
- **Q2 2015 EPS were \$0.48; EPS before charges/gains increased 16 percent to \$0.59**

DEERFIELD, III. July 22, 2015 – Fortune Brands Home & Security, Inc. (NYSE: FBHS), an industry-leading home and security products company, today announced second quarter 2015 results from continuing operations and updated its 2015 annual outlook for earnings per share.

“The rate of growth for the home products market improved modestly in the second quarter and our teams again delivered profit growth that was right on plan,” said Chris Klein, chief executive officer, Fortune Brands. “We continue to anticipate accelerating new construction activity in the second half of the year. Based on that market assumption and our solid execution, we are maintaining our expectations for our core business for the remainder of 2015.”

Second Quarter 2015

For the second quarter of 2015, sales were \$1.17 billion, an increase of 13 percent over the second quarter of 2014. Earnings per share were \$0.48, compared to \$0.51 in the prior-year quarter. EPS before charges/gains were \$0.59, compared to \$0.51 the same quarter last year. Operating income was \$128.2 million, compared to \$125.5 million in the prior-year quarter. Operating income before charges/gains was \$150.5 million, compared to \$125.6 million the same quarter last year.

“In the second quarter, sales increased 13 percent for the total company and 17 percent for the U.S. businesses. Importantly, operating income before charges/gains grew 20 percent, with solid performance across all operating segments,” Klein said.

For each segment in the second quarter of 2015, compared to the prior-year quarter:

- Cabinet sales increased 18 percent to the prior year. Excluding the impact of the Norcraft acquisition, sales increased 8 percent, with the dealer channel growing 10 percent and in-stock cabinet and vanities increasing high teens.
- Plumbing sales increased 5 percent, with growth across the U.S. wholesale and retail channels, offset somewhat by the impact of Canadian currency and slower China sales.
- Door sales were up 6 percent with growth in both the wholesale and retail channels.
- Security sales increased 28 percent driven by the SentrySafe acquisition.

“In the second quarter we also took advantage of the opportunity to secure long-term financing,” said Lee Wyatt, chief financial officer, Fortune Brands. “Importantly, with \$975 million of availability on our revolver, we have significant financial flexibility to drive incremental shareholder value.”

Annual Outlook for 2015

The Company’s 2015 outlook now includes the impact of the Norcraft acquisition, as well as incremental interest expense from the recent long-term financing.

The Company’s 2015 annual outlook continues to be based on a U.S. home products market growth assumption of 6 to 8 percent. Based on the Company’s expectation to continue outperforming the market, the acquisition of Norcraft and the impact of foreign currency, the Company expects full-year 2015 net sales growth in the range of 13 to 15 percent.

The Company updated its expectations for 2015 EPS before charges/gains to be in the range of \$2.03 to \$2.10, which compares to 2014 EPS before charges/gains of \$1.74. This EPS expectation now includes an incremental 4 to 5 cents due to the acquisition of Norcraft, partially offset by incremental interest expense unrelated to the Norcraft acquisition.

“The second quarter home products market improved modestly, as we had planned,” said Klein. “We continue to see positive signs and look for stronger market growth in the second half of the year.”

The Company expects to generate free cash flow of approximately \$270 million for the full year 2015. The expected free cash flow is net of anticipated capital expenditures of approximately \$135 million, as the Company invests in incremental capacity and infrastructure to support multi-year growth.

Free cash flow does not include adjustments for certain non-discretionary cash flows such as mandatory debt repayments. Free cash flow is a measure not derived in accordance with GAAP. This measure may be inconsistent with similar measures presented by other companies.

(1) Corporate expenses include the components of defined benefit plan expense other than service cost including actuarial gains and losses.

(2) Restructuring charges are costs incurred to implement significant cost reduction initiatives and include workforce reduction costs.

(3) "Other charges" represent charges or gains directly related to restructuring initiatives that cannot be reported as restructuring under GAAP. Such costs may include losses on disposal of inventories, trade receivables allowances from exiting product lines, accelerated depreciation resulting from the closure of facilities, and gains or losses on the sale of previously closed facilities.

(4) Represents actuarial gains or losses associated with our defined benefit plans. Actuarial gains or losses in a period represent the difference between actual and actuarially assumed experience, principally related to liability discount rates and plan asset returns, as well as other actuarial assumptions including compensation rates, turnover rates, and health care cost trend rates. The Company recognizes actuarial gains or losses immediately in operating income to the extent they cumulatively exceed a "corridor." The corridor is equal to the greater of 10% of the fair value of plan assets or 10% of a plan's projected benefit obligation. Actuarial gains or losses are determined at required remeasurement dates which occur at least annually in the fourth quarter. Remeasurements due to plan amendments and settlements may also occur in interim periods during the year. Our operating income before charges/gains reflects our expected rate of return on pension plan assets which in a given period may materially differ from our actual return on plan assets. Our liability discount rates and plan asset returns are based upon difficult to predict fluctuations in global bond and equity markets that are not directly related to the Company's business. We believe that the exclusion of actuarial gains or losses from operating income before charges/gains provides investors with useful supplemental information regarding the underlying performance of the business from period to period that may be considered in conjunction with our operating income as measured on a GAAP basis. We present this supplemental information because such actuarial gains or losses may create volatility in our operating income that does not necessarily have an immediate corresponding impact on operating cash flow or the actual compensation and benefits provided to our employees. The table below sets forth additional supplemental information on the Company's historical actual and expected rate of return on plan assets, as well as discount rates used to value its defined benefit obligations:
